LEE COUNTY FAIR OPENS WITH CROWD

Amboy Thronged Today as County Pumpkin Show Starts.

The Lee County Fair opened its annual session at Amboy today with an exceptionally large attendance, indicating one of the most successful meetings in the history of the association, and every patron on the grounds declares the fair to be as good as ever in every respect, and in some much better.

All of the exhibits are full, the free attractions are above the ordinary and the race programs bid fair to provide some dandy sport. There were eight starters in one of this afternoon's race and twelve in another, and the prospects for fine track events tomorrow and Friday are good.

Thursday, Big Day.
Thursday will be a tremendous day at the fair. The closing of Dixon's business houses and offices will result in hundreds of people from this city going to the "pumpkin show," and the entire east and southern part of the county will be there, too. The Burlington railroad will run a special train from Shabbona in the morning and reports from towns along the line are to the effect that the special will be well patronized.

The race program for tomorrow provides for a 214 trot, a 217 pace and a 225 pace, in each of which the purse is \$400. The entry list in each race is big, as is the case with the Friday races, which will be: 226 trot, Free-for-all pace and 224 trot.

Free Attractions Please.
The free attractions are proving very popular. They include Audra Newell's High School Arabian Horses; The Akuras, Jap Acrobats; Booth & Leander, cyclists; Prof. Newell, horse trainer; Hiram and Lucinda and airplane flights.

A big platform has been erected at the fair grounds and each evening of the fair there will be a big dance here.

Railroads to Honor Tickets of Those in Transit Aug. 26

All persons holding railroad tickets purchased prior to August 26 and who are actually in transit at midnight on August 25 will not be affected by the new passenger rates going into effect on August 26 and the ticket will be good to destination whether a round trip tourist ticket or one way ticket. First information as to what action railroads would take along this line when the new higher rate goes into effect was received in bulletins stating it will apply on all roads.

Conditions.

Following are some of the announcements on the bulletin.

"One way tickets sold prior to Aug. 26, held by passenger en route on August 26, will be honored to destination."

"Round trip or tourist tickets sold prior to Aug. 26 and upon which going passage has not commenced by that date, will not be honored for passage on or after Aug. 26, but will be redeemed at the fare paid therefor."

Passengers actually en route at midnight, Aug. 25, will be carried to destination of sleeping or parlor car ticket without an additional charge for the sleeping car or parlor car space but the surcharge will apply on all one-way or round trip tickets of every kind where the sleeping car or parlor car space was purchased for use after Aug. 26.

"Commutation tickets purchased prior to August 1 will be honored within their time limits."

George Phillips is Laid to Rest Today

The Jackie Recruiting band, which is spending the week here, assisted at the funeral of George W. Phillips, ex-service man, this afternoon, the firing squad being picked from the sailors' organization. The services were conducted by Rev. E. C. Lumsden and were in charge of Dixon Post No. 12, American Legion, from which organization the pall bearers were picked.

GRASS FIRE TODAY.

The fire department responded to an alarm at 10:30 this morning, being called to North Galena avenue where a grass fire along the Illinois Central right of way threatened surrounding property. The fire was extinguished before any damage was done.

DESERTER MAY GIVE EVIDENCE IN MOSS DEATH

Man Held at Madison Indicates Peters Was Slayer.

By Associated Press Leased Wire
Madison, Wis., Aug. 18.—An important development in the search for the slayer of Mrs. Leroy Moss, wife of Captain Leroy Moss, who was shot and killed on the night of June 15, while riding in an automobile near Camp Grant, is the arrest of Private Lester Van Tassel, yesterday by the Madison police. He is the son of Irving Van Tassel, this city.

In the police jail this morning Van Tassel declared that he and a companion, whose real name was Pine but who went by the alias Peters, were serving in the guard house at Camp Grant, Van Tassel for taking absence without leave.

"Peters had it in for Captain Moss," Van Tassel admitted, "because Moss had him up for court martial."

"Peters said he'd get the captain if he could but I don't know whether he did. Peters wanted to get away from the guard house and he asked me to go with him. I said 'sure I would.' So we left."

"About 7 o'clock that night Peters left me and I didn't see him again until 11 that night. I was waiting for a train at a little station near the camp. When I asked him where he had been he told me to shut up. He acted sort of nervous but he didn't tell me anything. He had no gun with him when he left me."

Van Tassel claims that this is the last he saw of Peters.

Van Tassel then according to his story, left for Madison, but did not stop here, going right on to Elroy where he worked for Bill Dwyer raking hay. Later he left Elroy and worked on a farm near Brooklyn, Wis. He was arrested yesterday in Tenney Park, and was booked on an indecent exposure charge. He had been in Madison several days.

CAMP OFFICIALS DOUBTFUL

By Associated Press Leased Wire
Camp Grant, Ill., Aug. 18.—Camp Grant authorities expressed no confidence today that the arrest of Private Lester Van Tassel at Madison, Wis., would clear up the mysterious shooting of Mrs. Maud Lucile Moss, wife of Captain Leroy H. Moss, which occurred at Camp Grant on the night of June 15.

Van Tassel, said to be one of the five military prisoners who broke arrest a few hours before the shooting of Mrs. Moss, was at first sought as a suspect, it was said at Camp today. Further investigation of the shooting, however, convinced the military authorities that neither Van Tassel nor his pal, George Peters, arrested June 21, was involved in the affair.

A military guard will be sent to Madison today to bring Van Tassel to camp to face court martial on charges of breaking arrest and desertion, authorities said.

Harding to Address Lumberman's Meeting

By Associated Press Leased Wire
Marion, Aug. 18.—Senator Harding was the invited guest of the Lumberman's Association of the Marion district at a picnic held today in a park on the outskirts of the city. It was expected that late in the afternoon he would deliver a brief address.

Most of the morning the nominee spent working on the address he will deliver tomorrow to a front porch delegation made up of members and former members of the Ohio legislature.

A group of members of the Society of American Indians, an organization founded several years ago at Ohio State University for the promotion of the interests of the Indian race called on the senator today.

Start Cement on Peoria Ave. Soon

Contractor Gund & Graham, of Freeport, expect to be able to start pouring cement on the Peoria avenue pavement improvement not later than Friday. The work of tearing up and putting the street in readiness for the concrete has progressed very rapidly. The pouring of the cement will start at Tenth street and continue north to Third.

WEATHER.

WEDNESDAY, AUGUST 18, 1920
Chicago and Vicinity—Fair tonight and probably Thursday, becoming unsettled Thursday night; not much change in temperature.

LOCAL TEMPERATURE
The range of the local temperature during the 24 hours ending this morning was between 91 and 60 degrees.

C. OF C. PLANS TO PRESERVE MEMORIAL ARCH; WANT MOTTO

Sec. King Installed in New Office—Working Road Improvement.

The Dixon Chamber of Commerce office, in charge of Secretary Carroll King, was opened this morning in the rooms in the I. O. O. F. building, Galena avenue and Second street, formerly occupied by Attorneys J. W. Watts and Martin Gannon, and an earnest invitation is extended to everyone to visit the office at any time. One of the suite of rooms was occupied today and the others will be ready for occupancy within a day or two. It is also announced that a telephone will be installed tomorrow. The number will be 26.

Secretary King is rapidly becoming one of the busiest men in Dixon and fruits of his activities may begin to become evident within a short time. The secretary is today circulating a petition asking for the construction of the Blackhawk Trail from Dixon to Rockford as soon as is practicable, and any citizen of Dixon or vicinity who would like to see that road put into first-class condition soon is asked to call at the C. C. office and sign the petition.

To Preserve Arch.

The Chamber of Commerce proposes to preserve the Memorial Arch across Galena avenue in front of the postoffice, and to that end it is to be repainted and repaired, and a new motto to be inscribed on it. It is desired to have the new motto set forth that the arch is a memorial of the service of the boys of this community who fought in the World War, and at the same time express Dixon's welcome to all who may come here to visit, to reside, or who merely make short stops while touring.

To secure the best possible wording for such a motto the Chamber asks that every one take an interest, evolve some motto and communicate it to the Secretary either by mail, personal call at the office or by telephone.

Favor Abolition of Utilities Commission

The city of Mattoon is leading a movement whereby all cities of the state are asked to join in a plan to do away with the state public utilities commission. A resolution adopted by the Mattoon city council has been printed and copies forwarded to all cities in the state.

The Dixon commission at its regular meeting last evening considered the resolution as adopted at Mattoon and may take some similar action, every member of the council being in favor of the movement. The resolution as adopted by the Mattoon city council favors the abolishing of the commission as it now exists and performs, pointing out that the commission by its proceedings takes away from the mayors and city councils of Illinois cities any right to control, regulate or influence these corporations, thus cutting off a real government by the people.

Final action was not taken by the Dixon council at its meeting last evening, the mayor and commissioners discussing the matter at some length, and indicating that some move would probably be started very shortly.

No Trace of Kin of Deceased Ex-Sailor

All efforts to locate relatives of Charles W. Conover, the young ex-sailor whose remains were found on the North Western tracks east of Sterling Monday, have thus far been futile. A telegram sent to his mother at a Chicago address found on a card in his clothing brought no response other than that the family had moved away. If no relatives are found it is probably arrangements will be made to give him a military funeral at Sterling as he was receiving a pension as a result of deafness incurred during service in the navy.

Twelve Injured in Missouri Train Wreck

By Associated Press Leased Wire
St. Louis, Mo., Aug. 18.—Twelve persons were injured, two probably seriously when a Missouri Pacific passenger train from St. Louis for Kansas City was derailed three miles west of Warrensburg, Mo., at 5:10 o'clock this morning, according to a report received at the general office of the railroad here.

HAD OPERATIONS HERE.
Miss Bernice Samsel, of Mt. Morris, submitted to an operation at the Katherine Shaw Betha hospital yesterday morning for appendicitis.

TAKING VACATION.
Miss Helen Gorham is taking a vacation from her duties at the Grand Detour Plow company.

WARNING

Automobilists who contemplate trips to Polo are warned that some miscreant has made free use of several long carpet tacks on the west road near Kavanaugh's Corners, and therefore the old "east" road will be found more satisfactory. One man who made the trip on the west road yesterday pulled 160 tacks out of his tires, and several others, who had heard of the presence of the tacks and tried to avoid them, picked up from a dozen to twenty. The tacks are long enough to puncture tires.

Shons Gets Partial Payment from City on Bridge Repair Work

Contractor W. H. Shons, of Freeport, has been paid over \$9,000 by the city of Dixon for the work of repairing the Galena avenue bridge to date and a like amount has been paid to the contractor by Lee county. At last night's session of the council a claim for \$4,000.50 was made payable to the contractor—this being but one of a number of smaller claims that have been paid.

The regular semi-monthly bills amounting to \$5,365.41, of which amount \$4,000.50 was paid to the contractor, was paid out by the city last evening. The council received a bid on the proposed Seventh street sewer improvement, which was filed in the mayor's office until Friday morning at 8 o'clock.

A supplemental assessment against the Jackson avenue sewer to pay for excavation of rock, was started by the council last evening. Louis Pitcher was appointed a member of the park board to fill the vacancy of J. N. Sterling who has moved out of the city.

Five Arrive Every Day from Europe

By Associated Press Leased Wire
Washington, Aug. 18.—More than 5,000 immigrants are arriving daily at Ellis Island, the department of labor announced today in reporting that the tide of immigration which set in after the armistice had been more than balanced by the increasing inflow of immigrants.

Only the difficulties of immigration from central Europe, department officials said, has prevented the outstripping of all previous records during the past year.

EQUAL PARTNERS

AMERICAN MONEY CAN BUY 'MOST ANYTHING' IN EUROPEAN NATIONS

Dr. T. O. Edgar Surprised at Conditions in Foreign Lands.

The tourist traveling in Europe with plenty of good coin of the United States, or any other nation whose currency has not depreciated, can live almost as well and as cheaply in some instances at less cost—as in the United States. Such was the discovery of Dr. T. O. Edgar, Dixon specialist, who has but recently returned from a trip to the continent, the principal object of which was special study at the great medical university at Vienna.

The doctor's journey took him into England, France, Switzerland and Austria. London he found the busiest place, and tourists all agree, he says, that London is the center of European activity. Hotels in London and Paris were crowded, and it is impossible for one to secure rooms in either city unless arrangements are made in advance.

Good Living with Swiss.
The serious curtailment of the incomes of European citizens because of the war, has resulted in a great falling off in the number of visitors from other European countries to Switzerland, and there Dr. Edgar found ample accommodations, fine foods and the best of everything at truly reasonable cost. Rates for rooms in the best hotels in Switzerland were from \$1 to \$1.50 per day; breakfasts cost about 35 cents and the finest kind of a dinner touched the purse for the very nominal sum of \$1.25.

In Switzerland the Dixon specialist noticed many city markets where new potatoes could be purchased for 4 cents a pound, old ones for 2 cents per lb.; string beans from 12 to 15 cents a pound; cherries 8 to 11 cents; tomatoes 8 to 15 cents; currants for 3 cents; butter 60 cents and milk 3 cents a quart.

Conditions in Vienna.
In Vienna the doctor was told conditions had improved very materially since the armistice, but there were still plenty of evidences of the serious straits to which the people of that great city have been put. There is plenty of everything to eat, with the exception of fresh milk—of which the doctor saw absolutely none while in Austria—but with the Vienna money depreciated to one-third of its former value.

IS IN BAD

By Associated Press Leased Wire
Danville, Ill., Aug. 18.—Because Louis Bremer, adjutant of the Curtis G. Redden Post of the American Legion introduced Mayor William Hale Thompson last night when he spoke here and was the only man on the speakers' platform with the Chicago official, an indignation meeting has been called for tonight by Commander Otto Lesch, when the Legion will demand that the adjutant resign his office.

Commander Lesch said Adjutant Bremer had violated the constitution and by laws of the legion by "mixing in politics" and that Bremer could not be adjutant of the post while he was commander. If Bremer refuses to resign the Legion members will vote on a resolution ousting him from office.

Various members of the legion in Danville bitterly resent the action of Bremer, many of them being outspoken in denouncing him for his participation in the Thompson meeting.

"We cannot forget the speeches made by Thompson against the American cause dropped back of our lines by German airplanes," said Commander Lesch in an interview.

Against Independence for Philippines Now

By Associated Press Leased Wire
Honolulu, Aug. 17.—(Tuesday) Independence for the Philippine Islands before the next 25 years was opposed by a "crime of the first magnitude" by Representative C. H. Randall of California, a member of the congressional party.

"The better educated Filipinos who are not politicians are practically unanimous in their opposition to independence," he said.

"The development of the Philippine Islands is stagnated because of the lack of capital due to uncertainty of the status of the future government."

"The shadow of Japanese aggression overlies almost the entire Orient. Thoughtful men are in semi-terror at the prospect of Japanese domination of Siberia, China, Korea and the Philippines, if the United States releases them later."

DAVIS AT PORTLAND, ORE.
Dixon friends of Mr. and Mrs. Allen Davis have received word stating that they have located near Portland, Ore., where Mr. Davis is engaged in the real estate business. Mr. Davis will be remembered here by a host of friends, he serving as secretary of the Dixon Y. M. C. A. for several months.

Mrs. L. L. Lightner returned to her home in LaSalle last evening after a few days' visit with relatives here.

AMENDMENT TO FEDERAL ACT PASSED

House Concurred in Action By Vote This Morning.

By Associated Press Leased Wire
Nashville, Tenn., Aug. 18.—Ratification of the federal suffrage amendment with favorable action by the Tennessee house.

The vote in the house was 49 to 47. The senate ratified the amendment last Friday by a vote of 25 to 4.

PITCHER MAYS' ALIBI SUBJECT UMPIRES' IRE

Evans and Dineen Say It Comes with Very Poor Grace.

By Associated Press Leased Wire
Boston, Aug. 18.—The explanation by Carl Mays of the New York Americans that the killing of Ray Chapman the star shortstop of the Cleveland club, was due to a rough spot on the ball which caused it to take an unexpected twist, was the subject of a statement today by Umpires William Evans and William Dineen of the American league.

"No pitcher in the American league resorted to trickery more than Carl Mays in attempting to rough a ball in order to get a break on it which would make it more difficult to hit," the statement said.

Is Poor Alibi
The umpires took notice of a remark attributed to Mays that Umpire Thomas Connolly, who was behind the plate, was responsible for the accident because he permitted a rough ball to say in the game. They characterized this alleged statement as an "alibi" that came with poor grace from the pitcher.

"A short time ago," they added "the club owners complained to President Johnson that too many balls were being thrown out. President Johnson sent out a bulletin telling the umpires to keep the balls in the games as much as possible, except those which were dangerous."

The players of the Boston and Detroit clubs who were at the point yesterday of signing a petition to have Mays banned from the game, today awaited word from Manager Speaker of the Cleveland club.

POLES FORCED FOE BACK FROM VISTULA RIVER

Soviet Peace Terms Are Given Polish Emissaries Today.

By Associated Press Leased Wire
Warsaw, Aug. 18.—Bolshevik forces advancing into Poland march ahead without any concern for their lines of communication, according to statements of refugees, gathered by the Warsaw Gazette. They have thus lost all touch with their bases and refugees stated there was nothing behind the relatively thin Bolshevik front line. They declared it was possible to travel Bolshevik soil without seeing a single Bolshevik soldier.

"A vigorous effort on the part of the Poles would be sufficient to inflict a decisive defeat upon the Soviet armies," the newspaper declares.

BULLETIN

DANZIG REGION CLEARED
By Associated Press Leased Wire
Paris, Aug. 18.—The Polish counter offensive with Thorn as its base has successfully cleared the Danzig corridor of Russian troops, according to a report received from the French mission in Poland today.

The Polish forces are still driving eastward, the report says.

FRANCE PROTESTS DECISION

Paris, Aug. 18.—(By Associated Press)—The French government intends to protest energetically against the decision of Reginald T. Tower, allied commissioner at Danzig who yesterday forbade further debarkation at Danzig of French munitions for Poland, it was learned today.

Several French munition ships now are anchored outside Danzig. Mr. Tower, according to a report from the French ambassador to Poland, takes the attitude that he has not sufficient allied troops to preserve order if further munitions are unloaded at Danzig.

Mr. Tower has asked the supreme council for new instructions, pending the arrival of which he will maintain his decision, but the council of ambassadors which is acting at the supreme council does not meet again until early in September.

Navy Band to Play at Fair Tomorrow

The Jackie Recruiting band which arrived in Dixon Monday for a week's stay, will be a feature at the Lee County Fair at Amboy tomorrow afternoon, arrangements having been perfected today for the appearance of the organization there as one of the free attractions. The band will also furnish the music for a dance to be given by the Dixon Post American Legion Friday evening and for a similar affair in Sterling Saturday evening.

This band, which is in charge of J. M. Jacobson, a C. P. O. in the navy, has a very unique history. It was organized by Jacobson a year ago at Great Lakes, and the chief made his selection from the aviation mechanic school, choosing the members from a large group of applicants. After a month of practice the organization went out on tour, first going to Wisconsin. They have traveled over most of the United States in the interest of recruiting, their expenses being paid by the navy, so that all of their programs are free.

Miss Wicher Taken Ill at Cedar Rapids

Miss Enid Wicher, who, with her mother, Mrs. Clyde Wicher, has been visiting in Cedar Rapids, was taken suddenly ill there recently and an emergency operation for appendicitis was necessary. Clyde Wicher, of Dixon, was called to the Iowa town. Miss Wicher is said to be recovering very nicely.

Newton Addressed Cedar Rapids Crowds

Rev. Joseph Fort Newton, formerly of Dixon and recently pastor of Temple Church, London, has been giving a series of talks in Cedar Rapids, Ia., where he has occasioned huge audiences on each occasion.

Rev. Newton says England feels that the United States entered the war too late and quit too early.

Today's Market Report

(By Associated Press Leased Wire.)

Grain Mart Firmer at Opening Today

By Associated Press Leased Wire
Chicago, Aug. 18.—Light receipts and a limited selling pressure at the start today caused wheat prices to open half cent to 3/4c higher, with December 2.39 and March 2.41. Prices hovered around here for the first hour after which the market attracted attention and became firmer.

Corn started in sympathy with wheat, opening quotations being unchanged to 1/4c higher with September 1.48 1/2 to 1.49 and December 1.25 to 1.25 1/2. The trade was light and it took but little buying by commission houses to make the market advance. Reports of rains in parts of Nebraska and Kansas led to some buying which gave additional strength.

There was a light trade in oats which started unchanged to 1/4c higher with September 69 1/2 to 69 3/4 and December 69 1/2 to 69 3/4. Continuation of the pressure which was so noticeable yesterday, caused the market to break but it soon rallied and advanced.

Provisions were quiet and easy, there being nothing doing early in pork while September lard was down 5c and October up 5c with ribs averaging 2c to 10c higher.

Chicago Produce

By Associated Press Leased Wire
Chicago, Aug. 18.—Butter unchanged.

AMERICAN MONEY CAN BUY 'MOST ANYTHING IN EUROPEAN NATIONS

(Continued from Page 1)

its real value even the nominal prices asked for food and clothing are prohibitive to the great middle class of Austrians.

British Feed Children.

In Vienna he found a British Food Relief Agency taking care of the feeding of hundreds of children between the ages of 1 and 6. Everyone of those kiddies had a card entitling him to so much of various kinds of food each week, and distribution was made at various times in the several wards of the city. Older school children, who give a part of their time to apportioning and weighing out the food supplies, assist in the distribution, also. Dr. Edgar learned that the British agency had sent many Austrian children to Holland, Switzerland and Italy to relieve the food demands in the capital.

In connection with this food distribution the doctor learned that everywhere throughout Europe the people think well of Hoover and his food relief organizations, which prevented much food being stolen and which placed the greater part of it in the hands of the needy. In Vienna he found no feeling against the United States or Americans, probably because of the fine relief work the Americans have rendered since the war.

There is a scarcity of cattle in Austria, consequently fresh milk is not obtainable. All other foods sell at nominal prices, the government having placed a maximum price on all products, but to the Vienna resident with no money these maximum prices might as well be four or five times what they are.

Dr. Edgar saw shoes displayed in Vienna shop windows; genuine Good-year welts for \$11, other leather \$4 to \$10, canvas tops, \$2.50 to \$4.50. Charges at the best hotel in Vienna, where he stopped were exceedingly reasonable. Including a 20 per cent war tax and incidental tips, his room cost him less than a dollar a day, and his meals from \$1 to \$1.50.

Transportation in Austria is very poor. Express trains to Switzerland and to Paris run but twice weekly, and on the journey into Austria through tickets cannot be purchased. The passenger buys a ticket to the boundary, where he must detain and purchase additional transportation and clear the customs. It took the Dixon physician six hours to do those two simple little things; and when he got going again he found there was no difference between first and second class passage.

Saw Folks Known Here.

In Geneva Dr. Edgar saw a cousin of W. C. Durkes, president of the City National Bank. This gentleman was formerly the world's greatest diamond broker, with headquarters in Amsterdam.

At Luzerne the Dixon man saw and visited with Mr. and Mrs. Tony Reidemann, brother-in-law and sister of Mrs. George Campbell of this city. The Reidemanns were formerly in Hamburg, where during the war they turned their great house into a hospital—which makes the Reidemanns' sojourn in Luzerne imperative. Mrs. Reidemann was recently decorated by Pope Benedict for her hospital work during the war.

While in Switzerland Dr. Edgar noticed an article in a Swiss newspaper telling of the death of Emile Louis Roussy, president and founder of the Nestle & Anglo Swiss Condensed Milk Co., builders of the present Borden plant in this city. He brought the clipping with him to show to Albert Hunter, the only man here now who came to Dixon from Switzerland and helped establish the factory in this city.

A. O. HUNTER, of Cincinnati, Ohio, who says Tanlac has certainly proven its worth in both his own and his wife's case. He wasn't able to work when he began taking it.

"Last fall I had the 'flu' and it left me in a very weak and run down condition with no appetite at all and such a weak stomach that even the smell of cooking made me sick. I was awfully nervous and night after night I couldn't sleep to do any good. I would get up in the morning tired and worn out and was so short of breath that a half hour's job would tire me as much as a whole day's work used to. In fact I finally had to give up a good job.

When I first started on Tanlac I was working for the Goodyear Rubber Co. in Akron, Ohio. I decided that anything that was being talked about so much was at least worth an honest trial. It worked like a charm in my case, and by the time I had taken my third bottle all of my troubles were gone and I found myself well and strong again.

"While in Akron my wife got so she couldn't eat. She lost weight and got very pale. Tanlac was doing me so much good I got her to try it and after taking two bottles, she is looking fine again. Her appetite is just splendid and she looks like a different person. It certainly has proven its worth to both of us and has come up to every I have read and heard about it."

The above statement was made by A. O. Hunter, 106 W. 7th St. Cincinnati, Ohio, a well-known mechanic now in the employ of the Cincinnati Abator Co.

Tanlac is sold in Dixon by the Public Drug & Book Co., and by the leading druggist in every town.

"Tickle," Passed Out at Show Performance Brings Investigation

By Associated Press Leased Wire

New York, Aug. 18.—James Shevlin, federal prohibition enforcement agent today started an investigation to ascertain whether there was really a "tickle" in the little souvenir bottles passed out last night at the opening performance of "Tickle Me" at a local theatre.

While singing an encore to one number entitled "We've got something," the chorus girls passed down the aisles carrying baskets filled with tiny bottles, labelled whiskey. Overcoming a wholesome timidity, a few in the audience opened their purses, sniffed, tasted, smacked their lips and gave exclamations and applause that left no doubt as to their opinion of the refreshment.

Two prohibition agents were sent to the theatre shortly before noon to see Arthur Hammerstein who had charge of the production.

Mr. Shevlin said that he was determined to make "as much trouble as possible" for the management if he found that the prohibition laws were violated.

"If they think this is funny press

Look for Show Down in Miners' Meeting

By Associated Press Leased Wire

Cleveland, Aug. 18.—Previous to today's point conference between the scale committees of the United Mine Workers of America and the bituminous coal operators of the central competitive field, it was believed there would be a show down.

The operators had made the miners a better offer than the one they had unanimously rejected Monday (35 to 72 cents a day increase) it was said, but the nature could not be learned until it had been presented to the full scale committee.

Fine Gold Flakes in New York Excavation

By Associated Press Leased Wire

New York, Aug. 18.—Engineers in charge of an excavation in the heart of New York's financial district today were treasuring some tiny yellow metal flakes that one of the engineers scraped from his muddy shoes. Tests of gold seekers had been applied to the flakes and indications pointed to discovery of gold in the very shadow of the sub-treasury building.

The engineers offered the theory that the metal might have been lost in the old canal which traversed the site years ago.

When making jelly, it is not advisable to boil more than four cupsful of juice at a time.

The greater the volume of any given liquid, the longer the time required to reduce the amount. Prolonged cooking makes a darker colored jelly. Apple jelly quickly cooked will be a pale amber in color, but if there is a lot of juice cooked at once the jelly becomes almost a dark topaz.

To Make Apple Jelly.

Choose tart apples not over-ripe. Wash and cut out any dark spots, but do not pare or core. Cut into eighths. Put into a granite preserving kettle with just enough water to allow the fruit to cook tender without burning. Drain juice. To each cup of juice, use $\frac{1}{2}$ cup of granulated sugar. Boil the juice 10 or 15 minutes before adding the sugar, as sugar and juice boiled long together also makes a darker jelly. Add sugar slowly and boil steadily until the liquid jellies, when a teaspoonful is taken out and quickly cooled in a saucer.

Many recipes say "boil 20 minutes." Sometimes jelly will "jell" at the end of 20 minutes and sometimes it won't. Very ripe fruit requires longer cooking than perfectly or under-ripe fruit. Therefore the jelly-maker must use

her own judgment as to when her jelly is done.

All scum should be removed as it rises to the top of the boiling sirup. Very careful jelly-makers strain the jelly through a straining cloth before putting it into glasses. To do this, wring the cloth out of warm water, stretch over a pitcher or a stew pan that will pour well. Pour the boiling liquid through the cloth. It will run through rapidly and should be poured immediately into the jelly glasses. The jelly is really much clearer and sparkling and amply repays the extra work.

If a few sprigs of mint are put in the straining cloth and the hot juice poured over them a delicious suggestion of mint is given to the jelly. This jelly is specially nice to serve with lamb or mutton.

Peaches will not make jelly all by themselves but if added to apples, a perfect jelly can be made.

Pears will not make a firm jelly unless some tart fruit is added. Plum and pears cooked together make an awfully good jelly with a different flavor.

If the jelly seems a little too "shaky," let it stand in a sunny window for two or three days with a piece of mosquito netting stretched over the glasses.

Jellies, preserves, jams and conserves help out many a meal in winter.

The bargain hunter in her zeal sometimes forgets that the unneeded article is never cheap. MARY.

There is one place in most households where a very definite "leak" is ignored. This is in the matter of lights.

The strength of the light depends entirely on the number of watts and 60 watts consumes more electricity than 40. In a closet, in a hall, any place, in fact, where a strong brilliant light is not needed, a considerable amount of "juice" can be saved by an intelligent choosing of electric light bulbs.

In a reading lamp, dressing lights and places that need much light, use high-powered bulbs and be sure that they are giving all there is in them to give. Lights burn out and use the same amount of electricity without making the proper light.

MENU FOR TOMORROW.

BREAKFAST—Peaches, cereal with top milk, toast, coffee.

LUNCHEON—"Bubble and Squeak," whole wheat bread, marmalade, tea.

DINNER—Broiled lamb chops, boiled rice, summer squash, endive salad, blackberries and cream, sponge cake, coffee.

MY OWN RECIPES.

When rice is substituted for potatoes it is necessary to be lavish in the use of butter. A tempting way to serve the rice is to melt two or three teaspoons of butter in a pan which can be covered tightly. When rice is cooked, drain, put in pan of melted butter, cover and shake over a hot fire. The grains seem to puff and each one is buttered. The rice should be salted when about half done.

"BUBBLE AND SQUEAK"

2 cups mashed potatoes
 $\frac{1}{2}$ cups cold chopped meat
 $\frac{1}{2}$ onion
 $\frac{1}{4}$ cup water or stock
Salt and pepper

Line a buttered baking dish with potato. Mince onion and add to meat. Moisten with water or stock. Fill potato shell with meat. Cover with a layer of potato, brush with melted butter and bake twenty to thirty minutes in a hot oven.

SUMMER SQUASH

Squash
Salt and pepper
Dried bread crumbs
2 teaspoons grated cheese
Eggs
Wash squash and cut in slices

about one-half inch thick. The squash may or may not be pared. Sprinkle with salt and pepper. Mix cheese with crumbs. Dip slices of squash in crumbs, then in egg slightly beaten with two tablespoons cold water. Dip again in crumbs and fry in hot fat. Drain on brown paper.

The early bird catches the worm, but it should be remembered that it's the early worm that gets caught.

MARY.

When the glass stopper of the vinegar or oil cruet sticks, don't hit it. The most careful tapping has been known to crack the neck of the bottle.

Pour water over the outside of the cruet, gradually increasing the temperature. The heat causes an almost infinitesimal amount of expansion of the glass holding the stopper but enough to allow its easy removal.

This will not break even cut glass. The slowly increasing heat tempers the glass, so there is no sudden change in temperature.

Menu for Tomorrow

BREAKFAST—Fresh pears creamed dried beef, baking powder biscuits, coffee.

LUNCHEON—Tomatoes stuffed and baked, bread and butter, pear conserve, tea.

DINNER—Salisbury steak, French fried potatoes, cauliflower in cream sauce, apple celery and nut salad, maple mousse, coffee.

My Own Recipes.

If the steak is carefully prepared and attractively served, the dinner will be worthy a "dressy" dessert such as maple mousse. The idea that foods must be in keeping with other is not to be sneezed at. Corned beef and cabbage would not be compatible with ice cream. But in this day of lost values, round steak sometimes has to be served to guests and the dessert relied upon to make a company dinner.

TOMATOES STUFFED AND BAKED

4 large tomatoes
2 ears of corn
1 egg
1-2 cup dried bread crumbs
1-2 cup chopped cooked ham
Pepper

Cut the top from the tomatoes. Scoop out inside pulp. Drain and use the tomato juice to moisten stuffing, discarding seeds. Cut tops from kernels of corn and scrape out milk. Mix corn, tomato juice, bread crumbs and ham. Add well beaten yolk of

egg. Season with pepper only if ham is salty. Fold in white of egg beaten stiff and dry. Fill tomatoes with mixture. Put a bit of butter on each tomato and bake in ramekins.

PEAR CONSERVE

4 pounds pear
3 pounds sugar
1 pound raisins
2 lemons
3 oranges
1 cup English walnuts

Peel and core pears. Cut in small pieces. Peel oranges and lemons and chop the peel. Cut the fruit into small pieces the same size as the pears. Put ingredients into a preserving kettle and boil till thick and the pears are transparent. Pour into glasses and seal when cold.

Cox and Aids Confer on Plans of Campaign

By Associated Press Leased Wire

Columbus, Aug. 18.—A conference on national campaign plans with Senator Harrison of the national speaker's bureau was the principal political affair today before Governor Cox, the Democratic presidential candidate.

Relief of Governor Cox from direction of details of his speaking itinerary, such as train arrangements, schedule making and other affairs, was one of the subjects taken up. Publicity affairs of the Democratic campaign, it was said, also were to be discussed. Governor Cox tabored professional "press agents" or personal "publicity directors" and it is understood that none will be attached to the Governor's immediate personal staff, but the candidate has other publicity suggestions in mind.

Another innovation in the Cox camp is a suggestion for a personal aide to the governor to assist him through crowds where he stops for speeches. The candidate shortly after his nomination refused attendance of plain clothes men, but his advisors are urging that a big, bulky man be assigned to him if only as a human wedge for clearing paths through crowds. Governor Cox will leave here tonight to fill a speaking engagement tomorrow night at South Bend, Ind., before the Indiana Democratic Editors Association.

RAILROAD DECOY

The railroad workers have received
an increase in pay after inexcusable
delays. The railroad companies have
been granted permission to increase
passenger and freight rates.

On the face of things, everything
should be happy with the common
carriers—new tracks should be laid
and new cars should be bought—merchandise which has been moving
worm-like from point of origin to
point of distribution should be deliv-
ered with speed—the passenger trains
should be as reliable as once they
were—the old spirit of enterprise
should revive.

So we all expect.
There seem to us to be factors in
the situation which may disappoint
these fond hopes.

The railroads have been decaying
these several years not only physical-
ly, but in other ways. They are no
longer attractive as investments.
They no longer appeal to those adven-
turous citizens who, whatever their
faults, must be credited with bringing
a great industry into being and to
making that industry proud of its la-
bors, proud of its financial successes,
proud as an institution which offered
wonderful things to ambitious, inge-
nious and resourceful young men.
Within the memory of most of us, the
youngster was envied who went di-
rectly to a railroad after leaving
school. There are better opportuni-
ties now, and the carriers cannot pick
and choose their young employees as
they used to, weed out the ones of
indifferent quality, hold tight to the
best of them.

The railroad workers do not look to
the companies for betterments in in-
come. It is the government at Wash-
ington which decides when their pay
shall be increased, how much the in-
crease shall be. The railroad com-
panies do not depend upon a government
guarantee. If it earns more than 6
per cent, the government takes the
excess. We have private ownership,
but virtually public management.
Railroad workers lose contact with
owners. Naturally, owners develop
indifference over losses which may be
due to poor management—the govern-
ment will pay the costs. Naturally
the incentive to hard work, unusual
work, enterprise and morale fades
away—the government takes away
the inevitable rewards of extreme in-
dustry and high ambition.

We cannot see how Washington
could have done anything else in the
circumstances when the railroad
problem was put up to it except to
assume a guardianship. It was a choice
between doing this thing and letting
the railroads collapse, our principal
means of transportation fall into ru-
ins. The course was bad. But the
facts compelled the country to follow
it. But having selected such a road,
having assumed the guardianship, we
must suffer the stone bruises and pay
the price. This last can very well be
a permanent, lackadaisical transporta-
tion.

It is a matter of history that canal
building proceeded while the rail-
roads were coming in to displace
them. The chronicles show that peo-

Health Questions Will Be Answered
If Sent to Information Bureau
U. S. Public Health Service, Wash-
ington, D. C.

Infectious diseases are usually trans-
mitted (1)—directly from one person to
another through the medium of dis-
charges from the body which contain
infectious germs or organisms in their
active state; (2) indirectly through
the medium of contaminated food and
drink; and (3) by certain biting insects,
mosquitoes, for example, which in the
manner of their kind, transmit infec-
tious agents from one person to another.

If all cases of infectious diseases
were well marked and could be
promptly and easily identified, the
danger of their spread would be great-
ly diminished, for we could then bet-
ter guard against infective discharges
but unfortunately, these diseases very
often appear in a mild, irregular and
unrecognized form, and are over-
looked or mistaken for some simple
malady and usually treated with home
remedies.

Another very common and danger-
ous source of infection, and one which
is now becoming more fully recog-
nized, is what are known as "carriers,"
that is, persons who retain actively
infectious organisms within their
body and who themselves are appar-
ently well, yet through the medium of
infectious discharges may transmit
disease to others. This very frequ-
ently occurs in connection with typhoid
fever.

Certain insects transmit infection.
We have indisputable evidence that
malaria and yellow fever are con-
veyed from one person to another by the
bite of certain infected mosquitoes
and, as far as we know at the present
time, there are no other means by
which these diseases are communi-
cated.

The fly is also regarded as a med-
ium of infection.

The flea that infests the rat trans-
mits the infection of bubonic plague,
and it has recently been shown that
the body louse carries the germs of
typhus fever from one person to an-
other.

Filth does not cause infectious dis-
ease, but disease thrives best where
there is filth, overcrowding and bad
air.

To illustrate: During the outbreak
of typhoid fever, which occurred in
New York in the winter of 1893-4, over
200 cases were discovered, and all
but two or three of them were found
among the tenement and lodging
house population, where uncleanli-
ness, lice and overcrowding were
rife.

The prompt detection of an infec-
tious disease is vitally important, for
this not only offers better chance for
recovery for those who are ill, but
goes far to prevent the spread of in-
fection.

Unfortunately, tuberculosis, which
exists almost everywhere, frequently
reaches an advanced stage before its
character is known, and little can be
done for the patient; meanwhile, in-
fective matter has been slowly dis-
tributed.

Smallpox often appears in a mild
form, and not infrequently is mistaken
for a condition which is not infec-
tious. Through such errors, serious
outbreaks may follow.

Diphtheria, measles and scarlet fe-
ver, which are more or less constantly
present, are frequently unrecognized.
There is no doubt that the increase
number of cases which occur at the
beginning of the school year, is due
largely to the transmission of dis-
charges from mild and undetected
cases, and not from infected clothing,
as was formerly supposed.

Leave it to the insurance agent to
remind a man that life is short at the
most.

underneath the old oak."

So they set their faces in the di-
rection Prickles lived, and, after walk-
ing about an hour, all but 55 minutes,
they came to a little hill covered with
big stones and a few trees. They could
see Prickles' sign quite plainly up over
his doorway.

seconds. It takes six and one-half

Science doesn't do very well meas-
uring star distances. Altogether it has
"guessees" at the distances of about
245 stars. There are stars 10 light
years away and even a little further
that have been measured. Beyond that
it is almost wholly guesswork.

This much is known to be true—the
vast bulk of the stars (some of them
the brightest we know) lie hundreds
and thousands—even millions of light
years away from us. That means that
the light from many stars started be-
fore the birth of Christ and that the
light we see tonight may be from a
star that has not swung in the heav-
ens for a million years.

even a tiny inkling of what that
means in one reading or a dozen.

NO TAMMANY IN ILLINOIS

The city of Chicago has gone broke
under the Thompson-Lundin admin-
istration. It is deep in debt and going
deeper. As a source of political pay it
is just about squeezed dry.

The state has a cash surplus of \$14,
000,000 in the treasury for the next
administration to begin work on. In
addition there are \$50,000,000 worth of
bonds to be sold.

The Thompson-Lundin organization
is seeking to control the state through
the election of Small and the rest of
the city hall slate. What would hap-
pen to the \$94,000,000 if the Thompson
Tammany should succeed seems too
evident to require comment.

And that isn't all. Under Thompson
the city tax rate has gone up by leaps
and bounds. The city hall has even
requested special permission from the
legislature to raise it still higher. At
the same time the state tax rate under
Lowden has dropped 33 per cent.

The organization which has spent all
the city's money, raised the tax rate,
and left it in debt seeks to supplant
the state administration which has
piled up a surplus and lowered the
state tax rate. No bunk can cloud
such an issue.—Chicago Tribune.

"AS OTHERS SEE US"

"The scene was astounding. Sixteen
thousand people—every man in his
shirt sleeves and every woman with a

Nick.
"Ha! ha! That's not hardware,
that's software," laughed the spiny
storekeeper. "So, son, I don't handle
them. They'd burst like shooting
crackers if I touched them."

"What do you sell?" asked the lit-
tle boy curiously.

"Collanders principally, although I
also specialize in salt shakers, pep-
per dusters and watering pots."
Suddenly Tingaling exclaimed.

"Why, Prickles, what on earth is the
matter with your ceiling. It's as full
of holes as a Swiss cheese!"

"Oh," explained the other. "I just
fell out of bed the other night."

Such is Life

Gum-chewing baseball players, we
are informed by the sports editor, keep
their idle gum on the bottoms of their
caps while batting. Which isn't such
a bad idea, and is passed along to
whoever is in need of the suggestion.

When your gum has lost its flavor
Or your jaws are unable
To massage it any longer
Do you park it 'neath the table?

Or have you ever laid it down
To ease your map a minute
And then forgotten where it was
Until you sat down in it?

Or have you ever discovered it
When just about to eat
And hastily removed it to
A home under your seat?

If you're guilty, sew a button,
One upon each lid and bonnet,
And when your jaw is tucked out
Just park your chewing on it!

Start the music, Mister, and we'll all
join in singing this touching flock of
verses, entitled:

"Where, oh where, is my wandering
gum tonight?"
Times have changed considerably
since that famous exponent of base-
balling, Pasty Tebeau laid down this
rule:

"If you must chaw, chaw terbacker,
and leave the gum to the ladies."

Benjamin N. Duke, tobacco king,
has this lovely boost for tobacco:

"I have never used tobacco in any
form in my life and have never had
any desire to do so, although I have
been connected with the cultivation
and manufacture of the weed since I
was a boy."

The good preacher was telling his
youthful audience about the creation
of the earth, the sun, and got round
to the moon.

He thought this a good opportunity
to test the children upon their knowl-
edge of the Sunday school lesson.

"Who made the moon to shine?" he
asked, sure that every child would
know the answer.

One little boy beat the others to the
floor.

"My father said last night as how
the policemen arrested some fellers
yesterday for making the moon
shine."

Ann Lacked All Sense of Moral Beau-
ty—She Was Unmoral.

THE BOOK OF ANN.

Women may be enemies instinctive-
ly, as some sharp critic avers, but
when it comes to spoiled romance and
glorified happiness, they develop a
deep sisterly sympathy. One never
can tell, I suppose, when one's own
romance may ferment and blow up
like over-ripe wine. Mrs. Best's story
fixed her place in the hearts of the
Lorimer women. She had done for
her daughter what the girl never
could have done for herself, whereas
Chrys and I had undertaken that dif-
ficult task with considerable reluct-
ance.

Mrs. Best had accounted for Ann
without intending to do so.

"So like her father!" the mother had
said. "So fond of beauty of form and
of color!"

Already I could see that the girl re-
sembled her father in another very
important way. She was extremely
fond of the opposite sex. Only men
counted with Ann. Bad form, of
course, to make oneself the center of
a group of all the men in the room!

Ann was doing that as I watched.
"She looks like a movie heroine dem-
onstrating popularity," thought I.
"And this divorce question is going
to rend the respectable tribe of Lor-
imer, some day."

I watched Jim, Jr., but of course he
was merely pleased to see that his
little girl was making such a grand hit
with the men of the family.

Fascinating little beauty she un-
doubtedly was, physically. At the
moment, she was going into a fine
ecstasy over a bouquet of blue fox-
glove, expensive stuff raised out of
season, and bought by daddy just to
give the new bride a momentary joy.

Doubtless Ann had inherited her
father's artistic tendencies. Physical
beauty, material loveliness, she adored,
but she lacked all sense of moral
beauty. She was utterly obtuse to the
right or wrong of things. She wasn't
immoral, she was unmoral.

That there were degrees of spiritual
beauty, and heights worth climbing
to, was beyond her understanding.

Jim, Jr., was an idealist. He im-
agined that the lovely shell of his
wife's person contained a soul like
that of his mother. One must climb
to reach such heights. Ann never would
be capable of making the trip.

Now that I knew about Ann's back-
ground, I could see why her mother
had no enthusiasm about her mar-
riage. She wasn't even complacent
because her daughter had caught one
of the prize fish in the sea of matri-

mony. She didn't deceive herself
about Ann.

"She knows that Ann will go phi-
landering some day, just like her
father, and we'll be in for a big scan-
dal," was my disagreeable conclusion.

I was haunted by some of Mrs.
Best's reflections, made in the pro-
gress of her matrimonial history.

"One is bound to be sorry if one
marries,—and if one does not! If the
man slumps, one is sorry if one gets
a divorce,—or if one does not!"

"That's a hopeless philosophy,"
thought I. "I suppose it's common
among over-sophisticated, over-expe-
rienced, over-sorry people. Now I
wonder what keeps Mrs. Best going?"

Something, surely, kept her going.
She absolutely refused to give up her
work in the movies. I guess few
women would have had the courage
to pass up a life of ease as the moth-
er-in-law of a Lorimer millionaire!

Her attitude made me admire her
tremendously.

"I'll keep at my work," she said
to Mother Lorimer. "I'll be loon-
some, I know, but I'll be independent. You
women can't understand, I'm afraid.
Only women who have earned their
way in the world can comprehend my
need to be 'on my own.' I hope you
realize that I'm grateful!"

Her appreciation of mother's sug-
gestion was awfully sincere. I think
all of us women admired her inde-
pendence, but I know very well that
the men of our family did not.

RECRUITING STATION FOR NAVY OPENS IN POST OFFICE, DIXON

Officer in Charge Points
Out Opportunities Of-
fered in Navy.

The U. S. Navy recruiting sub station with Chief Machinist Mate C. Day in charge, under the command of Commander N. W. Post, of Chicago, main recruiting station, has opened a sub station in the interest of recruiting for "Uncle Sam's" first line of defense—the NAVY.

Men between 17 and 35 years of age who are citizens of the United States, of sound mental and physical condition, good moral character and able to read and write the English language, find opportunity in the Navy.

Enlistment may be made for a term of two, three or four years, at the option of the applicant. Boys between the ages of 17 and 18 years may enlist for the period of minority. Pay ranges from \$33 per month for apprentice seamen to \$126 per month for chief petty officers with board and lodging and free medical attention.

Beside the seamen branch of the service which embraces seamen, quartermaster, turret captains, gunners mates and boatswains mates, the following trades, special and commissary service are obtainable: Machinist mates, electricians, (wireless and general) ship fitters, boilermakers, cooper-smiths, blacksmiths, plumbers and fitters, shipwrights, sailmakers, mates, water tenders, molliers, firemen, painters, printers, yeoman, hospital corpsmen, cooks and bakers.

Some of the advantages offered by the navy are: A free outfit of clothing sufficient ordinarily to last two years; transportation and subsistence from point of enlistment to place of assignment; travel allowance (cash) at the rate of five cents per mile from place of discharge to place of enlistment when discharged by cause of expiration of enlistment—for instance: a man who enlists at New York and is discharged at San Francisco, distance about 3,700 miles, will receive \$185 if discharged through physical disability, transportation and subsistence will be given to such an extent that the man is discharged, a liberal pension is given; free medical treatment, and if incapacitated for any duration from whatsoever cause, except for sickness or disease resulting from his own misconduct, a man's full pay continues so long as he is serving within his enlistment; a furlough of 30 days each year on full pay, provided ship is in home waters; certain advancements in rating with corresponding increase in pay to the deserving, privilege of allotting portion of monthly pay to bank for own savings or to dependent relatives, six months pay to dependent relative in case of death in line of duty; material increase in pay in reenlistment; four months gratuity may to honorably discharged men who reenlist within four months of discharge date; many details carrying pay from \$2 to \$25 per month; retirement after 30 years service on three-fourths full pay plus a liberal allowance for lodging and subsistence in most cases will amount to \$100 per month, an opportunity to enter the naval academy. (The examination is competitive and is open to all young men under 20 years of age.)

When completing the course at the Naval academy, the midshipmen—to which status the recruit passes when entering—emerges a commissioned officer with the rank of Ensign, one hundred appointments may be made each year. Splendid opportunity to become a chief petty officer upon reenlistment, which carries pay of upward of \$126 per month and board with privilege of competing in examination for warrant officer rank which rank furnishes a bridge by which a crossing can be made to the line of commissioned officers.

Before enlisting, the applicant if between 17 and 18 years of age, is required to furnish a "consent paper," which will be supplied by the recruiting station, and must be signed by the parents or legal guardian before a notary public or other official qualified to administer an oath. If applicant is 18 years of age or older, he must submit a birth certificate, which also is obtainable at the above source. This form may be signed by parents or other near relatives and witnessed by a notary public, postmaster or any city or county official.

To those interested attention is directed to the fact that who may enlist are strongly advised to take no clothing and few, if any personal effects with them other than what may be essential for use until reaching the Naval Training station, which will not be longer than two days. Trunks and suitcases should be left at home. The Navy furnishes a complete outfit of clothing, toilet articles and accessories. All met at training station and aboard ships are required to wear at all times, the prescribed navy uniform, but civilian dress may be worn when ashore on liberty in home parts when permitted by the Secretary of the Navy.

Numerous trades schools are maintained in the service for the instruction of yeoman, (clerical branch), cooks, bakers, commissary stewards, electricians, painters, carpenters, shipfitters, machinists mates, blacksmiths, cooper-smiths, seamen gunners, gasoline engine operators, musicians, hospital apprentices etc. Deserving men, showing aptitude for special lines of work are encouraged in getting assigned to the school that give instruction along lines of his tendency. A man's pay continues while he is undergoing instruction and there is no tuition to pay.

Entrance to these schools is usually authorized after the recruit has been in the service long enough to demonstrate his aptitude for the work in question, his reliability and general fitness for the service.

All apprentice seamen are transferred to a naval training station where they are instructed in the various duties of a man-of-war's man, and where they remain for a period of several months getting the ground work necessary to make them useful aboard ship, and to fit them for future instruction along trades or vocational lines.

The recruit is given instruction in the common school branches, such as reading, writing, spelling, arithmetic, geography, U. S. History and special branches which prepare him for higher ranks in the service. The work is most varied and interesting.

Every encouragement is given to athletics and the recruit is developed to the highest degree of efficiency in connection with physical attainment. Amusement of varied nature may be found at naval training stations and aboard ships. The food every where in the naval service is wholesome and the best obtainable being government inspected. As proof that the navy life is highly desirable to those who are acquainted with its conditions an astonishingly heavy percentage of the personnel are re-enlisted men.

A cruise in the navy will find the average man better prepared to meet the world and handle the affairs of life than will the experience obtained through nearly any other pursuit for same duration. Occasionally it is found that men are totally unfit for service and for this reason they some times become dissatisfied. For such men, certain provisions have been made whereby they can obtain their release.

If a man's parents become dependent upon him for support and he finds he can make higher wages in civilian life with which to come to their support, upon presenting this fact to the navy department, he is released under certain conditions. Only men of good habits, willing to work and desirous of advancement are wanted. Disolute, unreliable and no-progressive men are not wanted, and the navy will not tolerate them in its service, but weed them out when opportunity affords.

All eligible young men interested in the foregoing are cordially invited to call at the recruiting station for further information. Men who have it

John H. Fulk, 510 W. Seventh St., Dixon, says: "I am a shoe cutter by trade and have to stand in front of a cutting machine. There is a great deal of parring in connection with this work and I am sure that is what caused my kidneys to get out of order. I was completely down and out and unable to work for ten days. I could hardly move, my back pained so terribly and I couldn't lift the lightest weight. The kidney secretions passed too freely and it was annoying to have to get up so often at night to pass them. I read about Doan's Kidney Pills and got a box at the Public Drug & Book Co. drug store. After using them, the trouble disappeared."

YANK WEIGHT MEN AGAINST HARD RIVALS European Shot Putters and Hammer Men Are Developing.

By Associated Press Leased Wire
Olympic Stadium, Antwerp, Belgium, Aug. 18.—Friction over the unsatisfactory and disappointing showing of Swedish athletes in the seventh Olympiad games culminated last night that Ernie Hjertberg, trainer of the team had requested that he be relieved of further responsibility. The Swedish Olympic committee is not expected to take any action in the matter at this late date. Hjertberg will not go to Paris with the Swedish team and a number of American athletes who will participate in triangular games with French stars at Pershing's Stadium on Aug. 29.

The finals in the shot put and the elimination events in the hammer throw will be held today.

This year's Olympics, however, held no certainties for American weight

men as European stars in this branch of sport have developed rapidly. Included in today's program were elimination heats in the 5000 metre obstacle race and finals in the 10,000 metre walk in which three Americans have qualified; the 110 metre hurdles, in which Earl Thompson of Canada will have strong opposition; the broad jump and the tug of war. Three Americans, a Swede and a Frenchman will compete with Thompson in the 110 metre hurdles.

The preliminary heats in the 1600 metre race also were run.

DOWNING'S HERD WAS BEST IN PALMYRA FOR TESTS DURING MONTH

Tester Dickson's Report
for July Has Been
Made Public.

The month of July found H. E. Downing's herd of high-grade Holsteins again leading the association in the production of both milk and butter fat, with an average production of 1012.3 lbs. milk and 39.33 pounds butter fat for the month. This is the fifth this year that Mr. Downing's herd has lead the association and certainly speaks well for the careful selection and management practiced by Mr. Downing.

A. E. Giffrow owned the highest producing cow for the month in butter fat, a grade Holstein and Jersey, which made over 100 lbs. of butter in the first 30 days in milk.

Following are the names of the eight leading herds of the association based upon butter fat production:

The report shows, in order, owner's name, breed, number of cows on test, number of cows in milk, average production of milk per day in pounds, average pounds of butter fat per day, average pounds of milk per month, average pounds of butter fat per month:

You Should Wish for Beauty As Well As Cleanliness.

Washing the face is one thing. Caring for the complexion is another—so many women think. Not necessarily. The two operations may be combined. You can wash for beauty as well as for cleanliness, by using Remmo Sterilized Toilet Soap.

This splendid new Toilet Soap is a beautifier as well as a cleanser. It cleanses the skin as it should be cleaned. The rich, velvety lather removes all accumulations from the skin then washes out leaving the pores open and unhampered in performance of healthful functioning.

It is composed of properties that effect a decidedly beneficial influence over correction of skin disease and ailments.

It builds up skin health and complexion beauty of a permanent nature. The skin soon takes on a pleasing glow of natural beauty.

There is nothing mysterious or magical about it. Remmo Sterilized Toilet Soap is simply the one Toilet Soap so scientifically made it answers the purpose of both a cleanser and a beautifier. Made of finest ingredients.

Then sterilized at 198 degrees Fahrenheit—a method of manufacture, and the only method that can and does safeguard the purity of Toilet Soap.

Remmo Sterilized Toilet Soap costs no more than toilet soap that merely cleanses and often at the cost of skin beauty.

Try it. Create beauty while cleansing your skin.

Not a Bite of Breakfast Until You Drink Water

Says a glass of hot water and phosphate prevents illness and keeps us fit.

Just as coal, when it burns, leaves behind a certain amount of combustible material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which if not completely eliminated from the system each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left-over waste, toxins and ptomain-like poisons are formed and sucked into the blood. Men and women who can't get feeling right must begin to take inside baths. Before eating breakfast each morning drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash out of the thirty feet of bowels the previous day's accumulation of poisons and toxins and to keep the entire alimentary canal clean, pure and fresh. Those who are subject to sick headache, colds, biliousness, constipation, others who wake up with bad taste, foul breath, backache, rheumatic stiffness, or have a sour, gassy stomach after meals, are urged to get a quarter pound of limestone phosphate from the drug store, and begin practicing internal sanitation. This will cost very little, but is sufficient to make anyone an enthusiast on the subject. Remember inside bathing is more important than outside bathing, because the skin pores do not absorb impurities into the blood, causing poor health, while the bowel pores do. Just as soap and hot water cleanses, sweetens and freshens the skin, so hot water and limestone phosphate act on the stomach, liver, kidneys and bowels.

"Carmen" Soon to Be Heard in Dixon, Praised By Critics

Chicago—Musical Chicago is showing thanks and kind words on modest Ralph Dunbar, the head of the Ralph Dunbar Productions, who is engaged in reviving those famous

LORNA DOONE JACKSON as "Carmen" in Ralph Dunbar's production of "The Mikado".

operas: "Carmen," "Robin Hood" and "The Mikado," and all because Mr. Dunbar has decided to give American singers the preference over those of foreign birth.

"America possesses the most wonderful vocal talent in the world and I propose to develop it by en-

gaging only American born singers for my various operatic productions." was Mr. Dunbar's recent declaration. "I do not deny the talents of the foreign born," continued the producer. "But I am a firm believer in giving the home folks the first chance, consequently I have filled the casts and the choruses of my operas with vocalists who add U. S. A. to their signatures on hotel registers.

"In furthering this policy I have arranged to have my managers hear local singers in each city we visit. The best of these singers will be given an opportunity to develop their voices at my Chicago studio and then, if they pass the test, they will be coached by me in stagecraft and be given positions in my productions."

That Mr. Dunbar deserves all the pleasant things Chicagoans are saying about him, is self evident. He is one hundred percent American.

Mr. Dunbar's production of "Carmen" will be the attraction in Dixon, on Friday, September 17th, under the management of Charles Eastman at Assembly Park Auditorium.

Manager H. W. Harms, of the Wilbur Lumber Co., is in Milwaukee for a few days on business.

ROCHELLE.
Aug. 16.—The Chicago Union Giants trimmed the Rochelle Orioles 9 to 6 in a well played baseball game here Sunday afternoon. The colored boys were especially fast on bases and fortunate in bunting hits. In the second inning the visitors pulled a clever double steal and their antics all through the contest, especially those of Bingham kept the rooters highly amused.
Wesley and Sullivan were the battery for the visitors and Erickson and Ryan for Rochelle.
The score by innings:
Union Giants 0 3 0 2 0 0 3 1—9.
Rochelle 0 0 1 1 0 1 0 1—4.
Umpire—Harter.
Next Sunday the DeKalb Independents play in Rochelle.
Local motorists and tourists had better look a little out. Rochelle now boasts of additional police protection in the person of a state motorcycle

cop. Business has been brisk. The young man bagged thirty speeders on Saturday and is still going strong. The arrests are having their effect too for drivers are finding that is a case of safety first.
Paul L. Lazier, of Steward, was circulating among his many Rochelle friends on Sunday.
Fred Bull was over from DeKalb on Sunday.
Miss Alma White has returned from a visit with her sister at Nevada, Ia. Misses Myrtle and Hazel Buck, of Oak Park, arrived on Saturday for a visit with Miss Lillian Farnham.
Otto E. Blackman, who is on the Pacific coast, has wired his wife that he has purchased a home in San Diego, Cal. The family expects to move to California soon.
David Sherwood has accepted a position in the C. & N. W. freight office in this city.
Clarence Baker left Rochelle Wednesday evening for Kenkwick, Wash., where he was located prior to his army enlistment. A card received by his parents on Saturday said that he had reached Pocatello, Idaho.
Mr. and Mrs. Fred Miller and family spent Sunday with Rochelle relatives.
Arthur Atwater, of Wheaton, spent Sunday with his mother, Mrs. Alice Atwater.
C. A. Anderson spent the week-end at his home in Marengo.
Henry Wilcox, of Peconica, spent Sunday with his parents, Mr. and Mrs. Arthur Wilcox.
Mr. and Mrs. George Webber, of Compton, were calling on Rochelle relatives Saturday evening.
With four candidates in the field for the office of State's Attorney of Ogle county there is bound to be a battle royal when the poles close on the Republican primaries Wednesday, Sept. 15, 1920.

There are four candidates in the field, Fred E. Gardner and W. H. Dusher, of Rochelle, J. L. McDowell, of Oregon, and Leon A. Zick, of Polo. The office is particularly attractive to attorneys, especially to young attorneys, as it fits in with their regular law business, instead of taking them from their business as the average office does. Being State's Attorney virtually means a client who will furnish you \$3,000 worth of law business each year for a period of four years and for eight years if you handle the business as it should. Aside from the salary, the office is an attractive one. It furnishes real experience and will make a lawyer of a man who has it in him the stuff of which real lawyers are made. With so attractive an office it is no wonder that there are several who want it and want it badly.
Malden Barker submitted to an operation for the removal of his tonsils at the Lincoln hospital on Friday.

The approaching marriage of Miss Ethel Osborne and Mr. William Ewer has been announced. Prenuptial affairs are now being given for the young people including a kitchen shower by Misses Nellie Smith and Ella Ebersole at which time the twenty guests bestowed upon Miss Osborne a bushel basket full of useful kitchen utensils. Miss Osborne is employed in the offices of Mrs. E. C. File and T. E. Fouser and Mr. Ewer is employed in the garage of C. E. Lasier & Co.
Mrs. Phil W. May submitted to an operation for the removal of her tonsils at the Lincoln hospital on Friday.
The mere matter of bonding the City of Rochelle for \$45,000 to purchase the necessary equipment and improvements at the power plant brought out a voting strength of 42 for and 8 opposed or 50 votes. Work has been temporarily suspended on cleaning up the wreckage of the city standpipe tower. It is estimated that there are about 100,000 bricks in the pile. It costs the city about \$7.00 a thousand to clean them up by hand and when they are cleaned they are worth about \$20. The plan is to get a machine to do the work.
Out of a total currency supply of about \$6,000,000,000 in the country, it is estimated, less than half is in the banks.

CLEVELAND SIX

Wins Distinction By Its Better Qualities

The Cleveland Six has won a place of distinction among light cars because of its better qualities. Designed for every-day service on every kind of roadway, it is sturdily built for endurance. It seeks no glory in speed contests, but earns praise for its performance in doing well all that its thousands of owners expect of a good car.

The exclusive Cleveland Six motor, of the overhead valve type, quiet and responsive in an unusual degree, is alive with power. Power sufficient to give all the speed that any thoughtful driver would ever want to use and to take the loaded car on high up long climbing roadways.

Bodies of dignity and beauty are mounted on the Cleveland chassis. All are splendidly finished and upholstered.

Come see the Cleveland. Ride in it. Drive it. Then you will know.
